Create a new loop with the pink strand and slide it into the green loop made in Step 9.

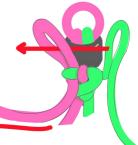

Pull the green tail until the green loop is wrapped around the pink loop and holding it in place.

When the second stitch is complete, it should look something like the picture to the right.

Continue the pattern by making a loop with the green strand, sliding it into the pink loop and tightening the pink tail.

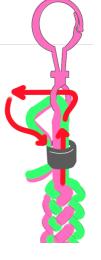

Repeat Steps 9-11 until the project is the desired length. To tie off the project feed the loose tail through the final loop and tighten.

To finish the project, add the second clasp by feeding both tails through a bead and through the hole on the clasp.

Feed the tails back through the bead as shown.

Tie one or two simple knots in the tails.

Trim the tails and add a drop or two of glue to secure the tails (optional).
